Undetermined ⁵	16.8	21,625	52	317	1,735	2,608	2,826	3,253	2,019

¹Includes cases prior to 1985 and through June 30, 2001.

²Percents may not sum to 100 percent due to rounding.

³Includes persons who have had heterosexual contact with a person with human immunodeficiency virus (HIV) infection or at risk of HIV infection.

⁴Receipt of blood transfusion, blood components, or tissue.

⁵Includes persons for whom risk information is incomplete (because of death, refusal to be interviewed, or loss to followup), persons still under investigation, men reported to have had heterosexual contact only with prostitutes, and interviewed persons for whom no specific risk is identified.

⁶Persons of Hispanic origin may be of any race.

NOTES: The AIDS case reporting definitions were expanded in 1985, 1987, and 1993. See Appendix II, AIDS. Excludes data for U.S. dependencies and possessions and independent nations in free association with the United States. Data for all years have been updated through June 30, 2001, to include temporally delayed case reports and may differ from previous editions of *Health, United States*. Similar data as of December 31, 2001, are available in the Centers for Disease Control and Prevention, HIV/AIDS Surveillance Report, Year-end edition Vol 13 No 2. 2001.
